

FOR IMMEDIATE RELEASE

## **Home Inspectors Use Smartphones to Take Credit Card Payments On-site**

Mercury VirtualTerminal™ simplifies billing, adds convenience

DURANGO, CO – May 10, 2011

Home inspection franchise, [A Buyer's Choice Home Inspections](#), today announced a new partnership with [Real Estate Management Outsource](#), to implement mobile payment processing technology for accounts receivables. Payment processing will be powered by Mercury VirtualTerminal™, a mobile payment application from Mercury Payment Systems®. Using Mercury VirtualTerminal, home inspection franchisees with A Buyer's Choice can now accept credit card payments from clients on-site, saving them the need to purchase or lease a traditional credit card terminal. The home inspector simply swipes or enters the credit card information and emails the home owner the receipt instantly.

"Having the ability to accept credit card payments from our customers, without the need for any special equipment, keeps costs low for the inspectors and makes it very convenient for our clients. They love it, and so do our home inspectors," said Melissa Morse, operations manager of A Buyer's Choice.

Mercury VirtualTerminal™ is a free PCI-compliant mobile payment solution that only requires an internet connection or smartphone to process transactions. Credit cards can be swiped with an iDynamo magnetic stripe reader attached to an iPhone, or manually entered on a smartphone or web browser.

For more information, contact Mercury at 800-846-4472, or Real Estate Management Outsource at 480-897-1736.
